

**USAID**  
FROM THE AMERICAN PEOPLE

## MUS: Perspectives from USAID

Sharon Murray

USAID EGAT / NRM / Water Team

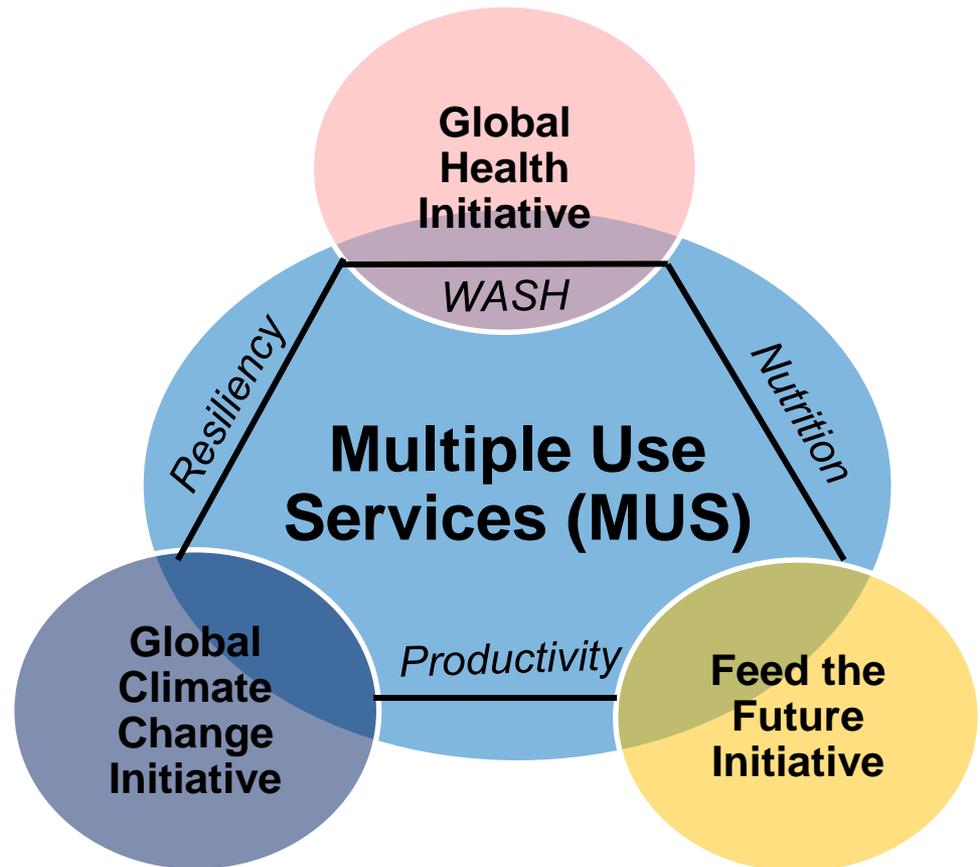

January 19, 2012

# ***USAID and MUS: A History***

- **2005:** Initial USAID/W staff ‘exposure’ to MUS concept
- **2006:** Concept mentioned in first RFA in Kenya (‘MUS-lite’)
- **2007-2010:** First rigorous MUS program built into USAID water program (WAWI-Niger)
- **2** **All of this driven by**
- **2** **USAID/Washington “champions”**
- **2010-2011:** New programs with significant MUS components launched in Tanzania (2010), Rwanda (2011), and Burkina Faso/Mali (2011); MUS training development supported through WASH Plus (*NOTE: All USAID MUS programs to date implemented by Winrock as one component of broader integrated programs*)
- **2011:** WB/USAID MOU signed – WASH Working Group selects MUS as a key mutual theme of interest

# Alignment with USAID Priorities

- Supports all three major Presidential Initiatives
- Potentially attributable to various ‘flavors of funding’ (earmarks and directives) – fits especially well with integrated programs
- Mentioned in USAID Water Strategy
- Good receptivity on the part of Missions

# Scaling Up MUS in USAID: Challenges

- **Staff are not widely aware** of approach, or research/evidence behind it
- USAID WASH or agriculture **implementing contractors/NGOs often do not have ‘rigorous’ MUS expertise**
- Implementing MUS requires **‘creative’ blending of earmark/directive funding** (WASH+ Food Security + Climate Change Adaptation, etc.)
- USAID has focused almost exclusively on **‘domestic plus’** model to date – will need full engagement of agriculture colleagues to pursue more **‘productive plus’** opportunities

# Scaling Up MUS in USAID: Recommendations

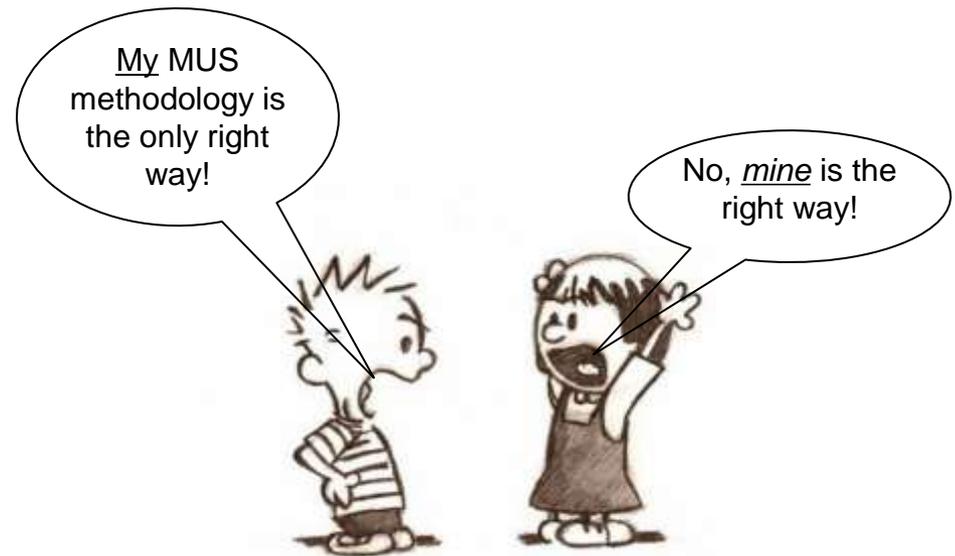

## **For USAID:**

- Conduct more **staff training** on MUS as a programming option – especially to non-WASH staff (FtF, etc.) *(already integrated into WASH and environment trainings...)*
- Support **capacity building of local and international partners** in rigorous MUS approaches through USAID water programming
- Collaborate with others to **document and disseminate field experiences/lessons learned** in MUS programming
- Partner strategically with the **World Bank** to introduce/scale-up approach within donor agencies

# Scaling Up MUS in USAID: Recommendations

## **For the MUS Group:**

- Produce more **analytics, guidance, and training materials** to systematize and standardize MUS approaches (entire typology)
- Better integrate the MUS approach into broader sector movement towards **sustainable service delivery** (e.g., SDA/Triple-S, WASHCost), and analogous approaches in sustainable agricultural water management

**Sustainable  
Irrigation  
Governance,  
Financing and  
Policies**

***“May the MUS be with you!”***

**Thank you!**

Sharon Murray (and other USAID friends!)
